

Superior Cleaning Just Got Easier

The extended cleaning table along with the longer frame are the perfect formula for better cleaning. Capable of fitting a full width; star table, stone table or chain in the secondary.

- Right or left hand discharge to accommodate each farmer's needs
- Steerable rear wheels allow for shorter turns
- Variable speed hydraulic drive on the rear cross to help eliminate bruising
- Heavy duty trailing coulters cut the potato vines
- Rear wheel lift for increased angles on the primary and secondary for increased cleaning
- Longer machine for more efficient cleaning of the potatoes
- Digger nose available in narrow or wide
- Available in center pull or offset hitch
- Larger tires for improved flotation

Specs

| | |
|--------------------|-----------------|
| Models | 554 XTS |
| Number of Rows | 4 |
| Row Spacing | 32" - 38" |
| Operating Speed | 2 - 5 mph |
| Headland to Turn | 14' - 18' |
| Est. HP (min) | 130 - 150 |
| Hydraulic Pressure | 1500 - 3000 psi |
| Base Machine (lbs) | 16,000 |

Side Discharge

Adjustable discharge height and variable speed rear cross allows the deposit of potatoes onto the ground at a consistent, bruise-free height.

Secondary Table

Hydraulically driven for cleaner potatoes in windrow. Removes small stones and loose dirt. Variable speed hydraulic drive.

Rear Height Adjustment

Adjustable rear lift allows operator to raise or lower the rear of the machine to accommodate changing conditions, even on side hills.
