

Perfecting Your Harvest Operation

Harvest at maximum capacity and minimize bruising with Lockwood's Windrower. All of the features you want in a machine that you can count on.

- Can-bus system with user-friendly joystick control option
- Rear wheel lift for steeper angles on the primary and secondary for increased cleaning
- Pressure-relieved coulter design allows for more movement
- Variable speed hydraulic drive on the rear cross to help minimize bruising
- Right or left hand discharge with fingertip control
- Rear cross telescopes in and out to assure proper placement of windrow
- Fits 34"-38" row spacing
- No steering tie-rod eliminates vine build-up on machine
- Steerable rear wheels allow for tighter turns
- Large tires for increased flotation

Specs	
Models	656
Number of Rows	6
Row Spacing	34" - 38"
Operating Speed	2 - 5 mph
Headland to Turn	20'
Est. HP (min)	150
Hydraulic Pressure	3000 psi
Base Machine (lbs)	22,000

Telescoping Rear Cross

Telescopes in and out allowing for accurate placement in guess rows.

New Design

More strength, less weight. This light-weight machine offers better visibility, pulls with less hp, and has improved flotation.

Steerable Rear Wheels

Better flotation. New design allows for sharper turns. Getting you in and out of the field faster.
